CONTENTS

T. Alfrey: Non-homogeneous stresses in visco-elastic media 113
A. Barjansky: The distortion of the Boussinesq field due to a circular hole . . 16
H. J. Barten: On the deflection of a cantilever beam 168
G. K. Batchelor: Power series expansions of the velocity potential in compressible flow 318
A. M. Binnie: Stresses in the diaphragms of diaphragm-pumps 37
K. E. Bisshopp: Lateral bending of symmetrically loaded conical discs . . . 205
B. S. Cain: On the treatment of discontinuities in beam deflection problems . 353
G. F. Carrier: The thermal-stress and body-force problems of the infinite orthotropic solid 31
W. Z. Chien: The intrinsic theory of thin shells and plates:
Part II. Application to thin plates 43
Part III. Application to thin shells 120
A. P. Cowgill: The mathematics of weir forms 142
H. B. Curry: The method of steepest descent for non-linear minimization problems 258
H. W. Emmons: The numerical solution of partial differential equations . . 173
L. Fox: Solution by relaxation methods of plane potential problems with mixed boundary conditions 251
J. N. Goodier: On combined flexure and torsion, and the flexural buckling of a twisted bar 93
M. Greenspan: Effect of a small hole on the stresses in a uniformly loaded plate 60
M. Herzberger: Studies in optics:
I. General coordinates for optical systems with central or axial symmetry 196
II. Analysis of a given system with the help of the characteristic function, using the direct method of analysis 336
N. J. Hoff: Corrections to my paper "A strain energy derivation of the torsional-flexural buckling loads of straight columns of thin-walled open sections" 172
B. Hoffmann: Kron's method of subspaces 218
W. H. Jurney: Note on flow in canals 342
E. G. Keller: Some present nonlinear problems of the electrical and aeronautical industries 72
E. Kosko: On the treatment of discontinuities in beam deflection problems . 271
O. Laporte: Rigorous solutions for the spanwise lift distribution of a certain class of airfoils 232
K. Levenberg: A method for the solution of certain non-linear problems in least squares 164
A. N. Lowan: Note on the problem of heat conduction in a semi-infinite hollow cylinder 348
A. N. Lowan and H. E. Salzer: Formulas for complex interpolation 272
W. R. MacLean: The resonator action theorem 329

V. Morkovin: Membrane stresses in shells of constant slope 102
——— Effect of a small hole on the stresses in a uniformly loaded plate . . 350
D. Moskovitz: The numerical solution of Laplace's and Poisson's equations . 148
H. Putman: The dynamics of a diffusing gas 267
D. H. Rock (*See A. Weinstein*)
H. E. Salzer (*See A. N. Lowan*)
S. A. Schelkunoff: Impedance concept in wave guides 1
——— Proposed symbols for the modified cosine and exponential integrals . 90
——— On waves in bent pipes 171
F. Steinhardt: Note on the elliptic wing 346
H. J. Stewart: The aerodynamics of a ring airfoil 136
J. L. Synge: A geometrical interpretation of the relaxation method 87
——— The problem of Saint Venant for a cylinder with free sides 307
H. Wayland: Expansion of determinantal equations into polynomial form . 277
A. Weinstein and D. H. Rock: On the bending of a clamped plate 262
Book Reviews 91, 275, 354
